

M. AMARJOTHI

QA Lead | Enterprise Storage Domain Specialist

skamarjothi@gmail.com | +91 9940113739 | Chennai, India | linkedin.com/in/amarjothi-m47a880146

PROFESSIONAL SUMMARY

Enterprise Storage Domain QA Lead with 15+ years of experience in SAN/NAS, Virtualization, Hyper-Converged Storage, and Kubernetes domains. Expert across the full Software Testing Life Cycle (STLC), firmware validation, performance testing, and automation triage. Passionate about continuous learning and actively exploring Python, Playwright, LangChain, Retrieval-Augmented Generation (RAG), AI Agents, and Agentic AI through practical projects to develop AI-driven quality engineering solutions, intelligent test automation, and enterprise workflow automation.

TECHNICAL SKILLS

Storage	SAN, NAS, FC, iSCSI, RAID, Erasure Coding, HCI
Storage Validation	Firmware, Feature, Performance & Stability Testing
Virtualization	VMware (ESXi, vCenter, vCSA), Hyper-V
Operating Systems	Windows, Linux, HP-UX, Solaris
Testing	Test Planning & Strategy, Functional & Regression Testing, Release Validation, Defect Management, Root Cause Analysis
Automation	Automation Test Execution, Failure Analysis & Triage, Python (Basic)
Cloud	GCP (Basic)
Tools & Frameworks	QC/ALM, STLC, Defect Lifecycle, Git, GitHub, Jenkins, Jira (Agile/Scrum), Docker, Kubernetes (Basic)
Server Platforms	Dell, Lenovo, Supermicro, HPE, Fujitsu
Currently Learning	Playwright, AI Agents, Agentic AI, LangChain, RAG, LLM Applications

WORK EXPERIENCE

QA Lead, Aziro Technologies

2019 – Present

Environment: SAN | NAS | FC | iSCSI | VMware ESXi | Hyper-V | Docker | Kubernetes | QC | Jira | Git | Jenkins

- Led and mentored the QA team, providing technical guidance and support.
- Proactively identified and escalated high-priority issues impacting product quality.
- Performed automated functional and regression validation across product releases.
- Validated storage data paths across array and host environments (Windows, Linux, HP-UX, Solaris; VMware, Hyper-V).
- Tested iSCSI and Fibre Channel (FC) protocol interoperability.
- Managed the defect lifecycle — investigation, tracking, validation, and closure — in collaboration with development teams.
- Investigated and reproduced customer-reported issues to support root cause analysis and defect resolution.

Lead Engineer, HCL Technologies

2016 – 2019

Environment: SAN | NAS | FC | iSCSI | VMware ESXi | AHV | Jira

- Qualified Solaris 11.3 and VMware ESXi (5.5, 6.0) with SOSAN across client-side and storage-side testing.
- Validated enterprise data services including Encryption, Replication, Backup, and Recovery.
- Performed Cluster Failover, High Availability (HA), Stress, and Scalability Testing.
- Qualified VMware ESXi (6.0, 6.5, 6.7) and Nutanix AHV platforms for Hyperconverged Infrastructure deployments.
- Developed and reviewed test plans, test cases, test strategies, and test reports for major product releases.

Test Engineer, American MegaTrends India Pvt Ltd

2011 – 2016

Environment: SAN | NAS | FC | iSCSI | VMware ESXi | Hyper-V | QC | Jira

- Validated VM provisioning and management through the StorTrends VWC Plugin for VMware vCenter.
- Verified datastore creation, expansion, deletion, and lifecycle management; tested data and instant cloning.
- Validated the iDATA performance-reporting tool covering key metrics for hybrid servers.
- Validated SnapTrends application-consistent snapshot creation, scheduling, and recovery for Windows applications.

PROJECTS

Aziron Technologies

HPE StabilityOps — Enterprise Storage Operating System

Tech Stack: SAN, NAS, FC, iSCSI, Windows, Linux, HP-UX, Solaris, VMware ESXi, Hyper-V

- Performed stability testing on major features from both array and host-side perspectives, focused on data path validation across OS and virtualization platforms.

Portworx – Anthos Certification Testing

Tech Stack: Portworx, GKE Anthos, Kubernetes, CSI Driver, vSphere, Baremetal

- Validated Portworx against Anthos using the CSI driver to achieve Anthos Ready storage partner certification.
- Validated Portworx against Anthos vSphere and Baremetal (versions 1.13, 1.14, 1.15) and analyzed Anthos logs.
- Led migration validation of Portworx clusters from Daemonset to Operator installation.

PSO to Portworx Migration Tool — Migration of Kubernetes storage volumes from PSO to Portworx

Tech Stack: Kubernetes, Portworx, PSO, StorageClasses, PVs, PVCs

- Validated seamless migration of Kubernetes storage volumes from PSO to Portworx, ensuring data integrity and uninterrupted I/O.
- Developed and reviewed test plans, test cases, and test strategy for comprehensive release validation.

Pivot3 Hyperconverged Infrastructure (HCI)

Tech Stack: VMware ESXi, Dell, Lenovo, Supermicro, Snapshots, Replication, HA, Milestone VMS

- Qualified Pivot3 vOS on Dell, Lenovo, and Supermicro platforms running VMware ESXi 6.5, 6.7, and 7.0.
- Validated Snapshots, Clones, Encryption, Replication, Backup, Recovery, HA, Cluster Failover, Stress and Scalability Testing.
- Executed PXE and bare-metal installations, and benchmarked performance using Milestone VMS.

HCL Technologies

Nutanix OS Qualification and Validation

Tech Stack: SAN, NAS, FC, iSCSI, VMware ESXi, AHV, Dell, Lenovo, Supermicro, Fujitsu

Qualified Solaris 11.3 with SOSAN (client-side and storage-side testing) and qualified ESXi 5.5 / 6.0 with SOSAN.

American Megatrends India Pvt Ltd

StorTrends VWC Plugin

Tech Stack: SAN, NAS, FC, iSCSI, VMware ESXi, Supermicro

- Performed functional and regression testing for VMware vCenter storage management features.

iDATA

Tech Stack: SAN, NAS, FC, iSCSI, VMware ESXi, Supermicro

Validated a background monitoring tool that generates performance reports with key metrics for hybrid servers.

SnapTrends

Tech Stack: SAN, NAS, FC, iSCSI, VMware ESXi, Supermicro

- Verified snapshot scheduling, management, and monitoring functionalities.
- Performed functional, regression, and reliability testing across supported environments.

SELF-INITIATED AI PROJECTS

Deep Document Analyzer & Chatbot

Tech Stack: Python, Streamlit, OpenAI API

- Built an AI-powered tool to analyze long documents and web articles, using a Map-Reduce summarization pipeline to condense lengthy content into concise summaries.
- Enabled users to chat directly with document and article content, handling text extraction and input parsing.

AI Video Summarizer & Key Point Extractor

Tech Stack: Python, Streamlit, LangChain, OpenAI API

- Built an end-to-end video analysis pipeline that downloads videos via yt-dlp, extracts audio using MoviePy/FFmpeg, and transcribes speech with OpenAI Whisper.
- Chunked long transcripts using RecursiveCharacterTextSplitter and generated concise summaries and key points using GPT via LangChain, with extensibility for action items, timestamps, and video chat.

AI Test Case Generator

Tech Stack: Python, Streamlit, OpenAI API, LangChain

- Generates functional, regression, and edge-case test cases from user stories or requirement documents.
- Produces positive, negative, boundary, and exploratory test scenarios automatically.

AI Bug Report Analyzer

Tech Stack: Python, Streamlit, OpenAI API, Pandas

- Analyzes defect reports and categorizes issues by severity, component, and probable root cause.
- Generates concise bug summaries and identifies duplicate defects.

EDUCATION

B.Tech, IT

Anna University

2010

Tamil Nadu

AWARDS & RECOGNITION

- Received consistent appreciation from the HPE client for leading the team, prioritizing high-severity issues, and resolving major configuration issues; nominated for the Rewards & Recognition award four times across 2024, 2025, and 2026.
- Received the She Rocks Award (Nakshatra category) while working with Portworx, 2022.
- Received the Best Performer Award while working with the Pivot3 client, 2020.
- Received the Outstanding Performance Award while working with Nutanix project on 2019.
- Received the Team Performer Award while working with AMI Stortrends project on 2014.
- Received the Star Performer Award while working with AMI Stortrends project on 2015.
- 15+ years of sustained contribution across enterprise storage QA — SAN/NAS, Hyperconverged Infrastructure, and Kubernetes storage validation.
- Trusted to lead root cause analysis and customer-escalation investigations across multiple flagship storage products (HPE, Portworx, Pivot3, Nutanix).
- Actively expanding into AI-driven testing and automation — Python, Playwright, AI Agents, Agentic AI, LangChain, and RAG.
